Stelan Briyan Simonsz

Technical Lead · GenAI

Solutioning, delivery, and team ownership

stelan.bz@gmail.com +94 773710072 linkedin.com/in/stelan-briyan-simonsz

10+ YEARS OF EXPERIENCE

SKILLS

JVM AND BACKEND
Java, Scala, Spring Boot, Hibernate, MyBatis, JUnit, RESTful APIs, GraphQL

DATA AND PERFORMANCE
PostgreSQL, MySQL, MariaDB, MongoDB, Redis, Apache Spark, application and API performance tuning

PLATFORM AND OPERATIONS
Kubernetes, Rancher, Docker, OpenTelemetry, Grafana, New Relic, AWS, Microsoft Azure, CI/CD, production monitoring and alerting

ARCHITECTURE
Microservices, distributed SaaS services, event-driven architecture, multithreading, BPMN

DELIVERY LEADERSHIP
Team leadership, planning, ownership through to production, coordination with clients, product managers, and business analysts

ACCESS AND SECURITY
Role-based access control, OIDC, SAML, authorization, secure access governance

OTHER LANGUAGES
Go, Python, C# / .NET, JavaScript (React, Node.js)

AI AND MACHINE LEARNING
LLMs, RAG, Prompt Engineering, LangChain, OpenAI APIs, LLM-as-judge, evals

TOOLS
Git, Jenkins, Postman, JIRA, Confluence

EDUCATION

MSc Artificial Intelligence
Reading · London Metropolitan University, UK

B.Eng. (Hons) Software Engineering
First Class Honours · University of Westminster, UK

ABSD and CMJD
Advanced Business Solution Developer · Comprehensive Master Java Developer · Institute of Java Software Engineering, Oracle Training Partner · 2014–2016

CERTIFICATION

AWS Certified Solutions Architect
Associate · SAA-C03

SUMMARY

I am a technical lead with 10+ years of experience, and I am more than a developer. I learn what a business needs, then I put that learning into working systems that save time, improve the product, and help the company grow. I treat company growth and my own growth as one path: I take ownership, lead teams, and keep learning so I can lead the work. **Leading companies get someone who learns quickly, delivers real value, and stays focused on long-term growth.**

EXPERIENCE

01 Tech Lead - Software Engineering (Backend)

Aventude — Aug 2023 – Present

- Built a Norwegian legal chatbot (NB-SBERT-v2, Borealis-12B, end-to-end RAG, LLM-as-judge) that answers law and regulatory handbooks.
- Ran concurrent European municipal deliveries, including Lovdata content automations in .NET and C#.
- Shipped KF Oppgavekoder (Scala, React) so municipalities publish task codes, with edits and version history.
- Cut Compose Glow critical response times from ~10s to under 400ms (about 25×) on Java and Spring Boot.
- Launched an AI form-and-workflow assistant that removed manual configuration.
- Released Roles and Permissions, giving the platform governed, role-based access.
- Shipped E-Signing, Summary Submissions, and dynamic fields (Tables, Calculators, Telephone).

02 Staff Software Engineer - Tech Lead

Circles.Life — Aug 2022 – Aug 2023

- Won the Exceptional Spirit - Best Performance award multiple times.
- Led zero-downtime go-lives for ONIC, AT&T, and Telkomsel with no service break across 150M+ users, building the Java and Spring Boot microservices and APIs that carried those launches.
- Achieved zero P1/P2 production incidents over 6 months by resolving critical database bottlenecks, optimizing high-latency APIs, and implementing proactive observability using New Relic and Grafana.
- Introduced an LLM knowledge base that shortened onboarding for new engineers and L2 support.
- Led the team through sprint planning, task breakdown, Jira tickets, low-level design, and solution and demo walkthroughs while planning releases and production readiness.
- Gathered requirements with product owners and provided the solutions.
- Supported inventory and catalog services across major new telco launches, delivering custom features tailored to Oasis (UAE) and VNPT (Vietnam).
- Enhanced core platform reliability to handle high-volume telecom workloads without service degradation during new market rollouts.
- Collaborated on adapting catalog and inventory microservices to meet unique regional business rules and feature requirements for UAE and Vietnam telco operators.
- Provided end-to-end engineering support for production readiness, feature validation, and stable cutovers for Oasis and VNPT deployments.

EXPERIENCE

03 Associate Technical Specialist - MarTech

Wiley (John Wiley and Sons, Inc.) Mar 2021 – Jul 2022

- Integrated 7 MarTech platforms - Eloqua, Snowflake, Salesforce, Qualtrics, Adobe, Brightcove, and Bizzabo.
- Rebuilt data pipelines so campaign data stayed accurate and reporting stayed in sync.
- Led solution design and live stakeholder demos through to delivery.

04 Senior Software Engineer / Tech Lead

Object One (Pvt) Ltd Jun 2018 – Feb 2021

- Led Ncell Social Distribution, a national telecom sales platform for distributors, retailers, and customer onboarding.
- Moved delivery onto microservices and CI/CD, raising release quality through reviews and automated deploys.
- Built Dialog Axiata's CMU so complaints run from intake to resolution on Java, Spring Boot, and Angular.
- Shipped REST APIs and Jira plugins that took manual steps out of production support.

05 Software Engineer / Senior Software Engineer

SP Solutions (Pvt) Ltd Jun 2016 – May 2018

- Delivered core banking systems for 5 banks: Standard Chartered, Union Bank, Seylan, DFCC, and Pan Asia.
- Replaced EJB-JSF monoliths with Spring Boot microservices, improving scale and maintainability.

AWARDS AND ACTIVITIES

Achieved multiple 1st place and recognition awards in national and international software innovation competitions through an AI and IoT Smart Shoe. Recognized at the following.

- NBQSA 2020
- e-Swabhimani 2021
- SLASSCOM Ingenuity Awards 2021
- University innovation competitions
- APICTA
- InnoServe Awards 2020
- World Summit Awards

PUBLIC SPEAKING

Addressed CIOs and technology leaders from leading Sri Lankan companies at RTC, Colombo, on the impact of AI, how it is used, and evaluation methods.

VOLUNTEERING

Lotus Tower Mobile App, digitization of the Dental Restoration Unit at Badulla PGH, and a Respiratory Clinic system at Nawalapitiya District Hospital.

COMMUNITY

Voxxed Days Singapore 2019. Mentored junior developers at the University of Ruhuna in 2018 and contributed to university technical events.

I do hereby declare that the information provided above is true and accurate to the best of my knowledge. - Stelan Briyan Simonsz
