STELAN BRIYAN SIMONSZ

Tech Lead - Software Engineering | Designing Reliable, Scalable Systems | Java/Python | Cloud | 10+ Year

stelan.bz@gmail.com | +94 773710072 | Sri Lanka | linkedin.com/in/stelan-briyan-simonsz

PROFESSIONAL SUMMARY

Lead Software Engineer with 10+ years of experience designing and delivering scalable, cloud-native SaaS solutions using Java, Spring Boot, and microservices architecture. Experienced in system design, production-grade deployments, and leading end-to-end delivery of complex platforms. Strong background in Agile leadership, team mentoring, and engineering excellence. Currently advancing in AI Engineering with practical experience in LLMs, Python, and Azure OpenAI, building intelligent chatbot and automation solutions. Committed to continuous learning and applying emerging technologies to drive innovation and business impact.

SKILLS

- **Programming Languages:** Java, Python
- **Frameworks and Libraries:** Spring Boot, Node.js, MyBatis, Hibernate, JUnit, GraphQL
- **Cloud and DevOps:** AWS, Microsoft Azure, Docker, Kubernetes, CI/CD
- **Architecture and Engineering:** Microservices, Event-Driven Architecture, Multithreading, RESTful APIs, BPMN
- **Databases:** MySQL, MariaDB, PostgreSQL, MongoDB, Redis
- **AI and Machine Learning:** LLMs, Prompt Engineering, LangChain, OpenAI APIs
- **Tools and Platforms:** Git, Jenkins, Postman, JIRA, Confluence
- **Developer Productivity:** GenAI-Assisted Development (LLMs, debugging), Cursor, Codex

PROFESSIONAL EXPERIENCE

Tech Lead - Software Engineering (Backend)

Aventude | Aug 2023 - Present

- Contributed to Compose Glow (usecompose.com), a Norwegian SaaS platform, by designing and implementing scalable backend services using Java and Spring Boot.
- Developed and integrated an AI-powered chatbot to automate form and workflow design processes, improving user productivity and reducing manual configuration effort.
- Optimized application performance, reducing response times for critical user journeys from ~10 seconds to under 400 ms.
- Led the design, development, and release of the Roles and Permissions module, ensuring secure access control and governance.
- Delivered major platform features including E-Signing, Summary Submissions, and dynamic form components such as Tables, Calculators, and Telephone fields.
- Developed and maintained integrations with external systems, APIs, and third-party services to enhance platform capabilities.
- Managed feature deployments and production releases, ensuring smooth and reliable delivery to client environments.
- Collaborated with product owners, QA engineers, and cross-functional teams throughout the full software development lifecycle.
- Supported quality assurance activities, including testing, issue verification, and release readiness during critical project phases.
- Participated in sprint planning, effort estimation, technical design discussions, and solution architecture decisions.

Staff Software Engineer - Tech Lead

Circles.Life | Aug 2022 - Aug 2023

- Led the design and development of scalable backend services leveraging Java, Spring Boot, and microservices architecture to deliver high-performance and resilient systems.
- Built and maintained RESTful APIs for enterprise-grade applications with focus on performance, reliability, and maintainability.
- Awarded Exceptional Spirit - Best Performance Award.
- Led zero-downtime production go-live launches for ONIC, AT&T, and Telkomsel platforms, serving a combined customer base of over 150 million users.
- Led and managed engineering teams, provided technical leadership across multiple domains, and served as the primary technical point of contact for stakeholders.
- Implemented and improved monitoring, alerting, and observability systems to enhance uptime, system reliability, and proactive issue detection.

- Collaborated with product managers, architects, and business stakeholders to define technical roadmaps and align engineering solutions with strategic goals.
- Introduced an LLM-based knowledge sharing mechanism to accelerate onboarding of new team members and support training of L2 teams.
- Owned end-to-end delivery planning and execution, ensuring timely delivery of features aligned with business and operational objectives.
- Participated in hiring processes by interviewing and evaluating engineering candidates and contributing to team-building initiatives.

Associate Technical Specialist - MarTech

Wiley (John Wiley and Sons, Inc.) | Mar 2021 - Jul 2022

- Delivered MarTech integrations across enterprise platforms including Eloqua, Snowflake, Salesforce, Qualtrics, Adobe, Brightcove, and Bizzabo.
- Designed, built, and optimized scalable data pipelines to improve data accuracy, synchronization, and reporting efficiency.
- Led end-to-end technical solution design, conducted stakeholder demos, and collaborated across cross-functional teams to ensure successful delivery.

Tech Lead - Software Engineering

Object One (Pvt) Ltd | 2020 - Feb 2021

- Project: Ncell Social Distribution Application. Led the architecture, development, and delivery of a large-scale telecom sales distribution platform supporting sales operations, distributor and retailer management, and customer onboarding.
- Managed cross-functional teams, drove technical design and Agile delivery, and implemented microservices-based solutions.
- Improved software quality through CI/CD automation, code reviews, and deployment optimizations.

Senior Software Engineer

Object One (Pvt) Ltd | Jun 2018 - 2020

- Project: CMU - Complaint Management Unit for Dialog Axiata. Developed and enhanced enterprise complaint management solutions for Dialog Axiata, focusing on customer complaint handling and resolution workflows.
- Built scalable applications, REST APIs, and Jira plugins using Java, Spring Boot, and Angular.
- Contributed across the full SDLC, CI/CD improvements, and production support to enhance operational efficiency and customer experience.

Software Engineer / Senior Software Engineer

SP Solutions (Pvt) Ltd | Jun 2016 - May 2018

- Delivered enterprise banking solutions for Standard Chartered, Union Bank, Seylan, DFCC, and Pan Asia.
- Migrated legacy monolithic EJB-JSF applications to scalable microservices architecture using Spring Boot and Angular.
- Improved system scalability, maintainability, and overall user experience through modern architectural redesign and optimization.

EDUCATION

- MSc Artificial Intelligence - Reading | London Metropolitan University, UK
- B.Eng. (Hons) Software Engineering - First Class Honours | University of Westminster, UK
- ABSD - Advanced Business Solution Developer | CMJD - Comprehensive Master Java Developer
- Institute of Java Software Engineering (Authorized ORACLE Training Partner) | 2014 - 2016

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate (SAA-C03)

AWARDS AND ACTIVITIES

- **Global and National Awards:** Achieved multiple 1st place and recognition awards in national and international software innovation competitions through the development of an AI and IoT-powered Smart Shoe Device. Recognized at NBQSA 2020, APICTA, e-Swabhimani 2021, InnoServe Awards 2020, SLASSCOM Ingenuity Awards 2021, World Summit Awards, and university innovation competitions.
- **Volunteering Initiatives:** Contributed to impactful digital transformation projects including Lotus Tower Mobile App, digitization of Dental Restoration Unit (Badulla PGH), and Respiratory Clinic system (Nawalapitiya District Hospital).
- **International Conference Participation:** Attended Voxxed Days Singapore 2019, engaging with global developer and software engineering communities.
- **Mentoring and Leadership:** Mentored junior developers at University of Ruhuna (2018) and actively contributed to university-level technical events and knowledge sharing.

I do hereby declare that the information provided above is true and accurate to the best of my knowledge. — Stelan Briyan Simonsz
